

# DYNAMIC OPTICS

ADAPTIVE OPTICS TECHNOLOGIES

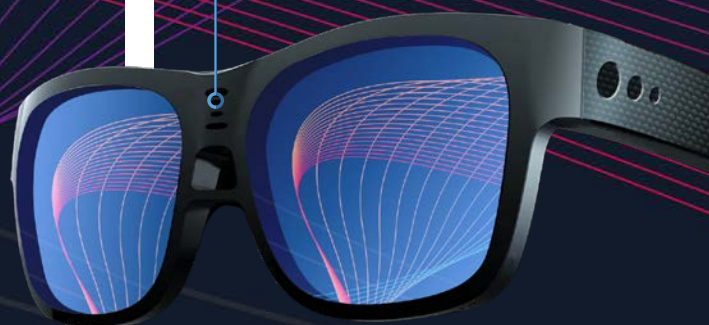

**ADJUSTABLE** near and far vision by dynamic **AUTOFOCUS** eyewear

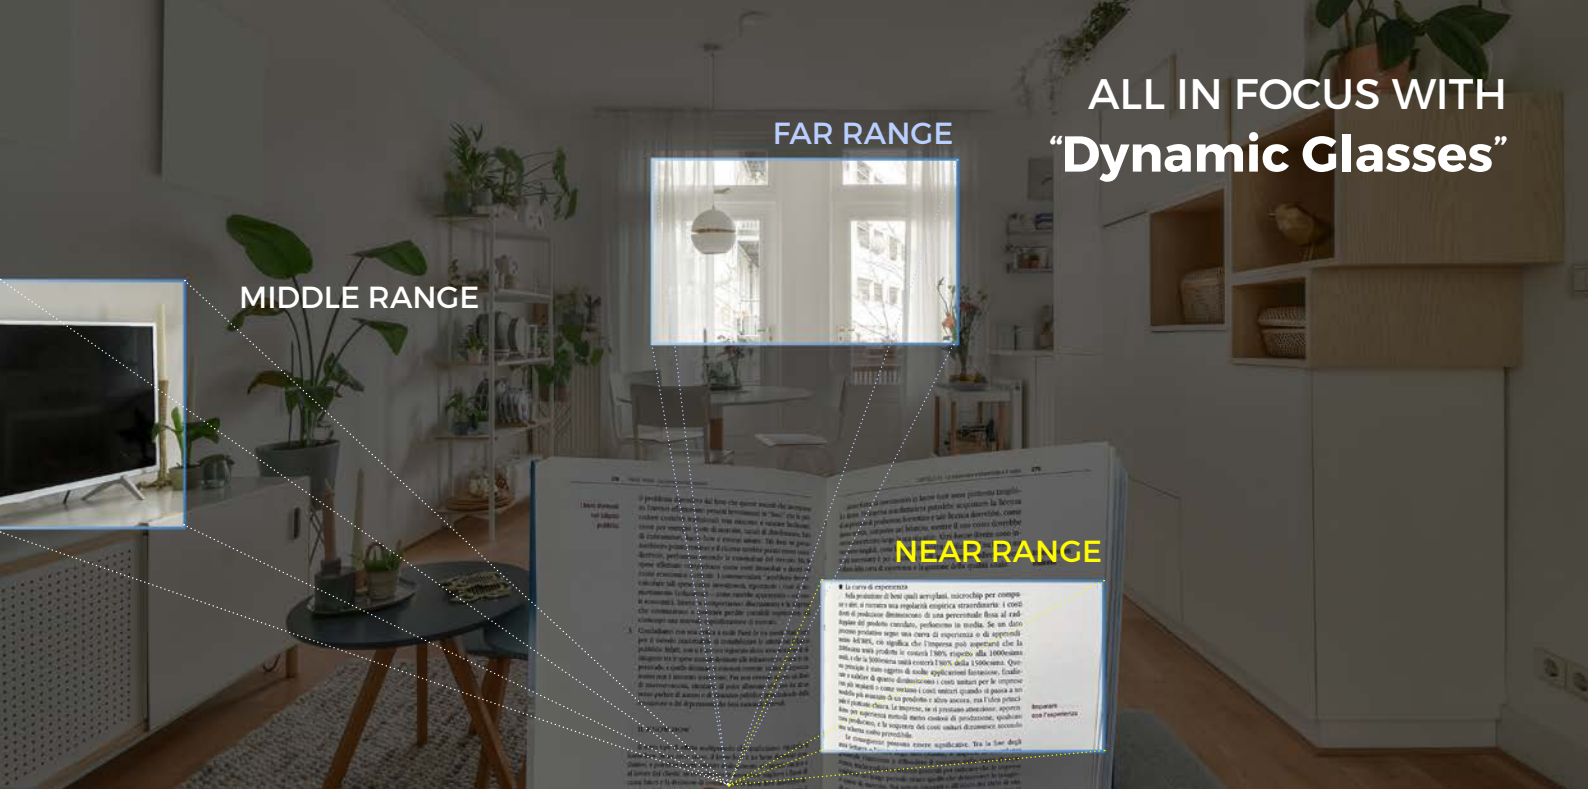

**DYNAMIC GLASSES**

Advanced eyewear technology which **FOLLOWS** your sight and automatically **ADAPTS** the focal power of your lenses for a **SHARP** and **CLEAR** vision.

Embedded sensors and algorithm keep in focus your sight to what you look at.

# ALL IN FOCUS WITH "Dynamic Glasses"

WITH TRADITIONAL GLASSES  
ONLY NEAR RANGE

WITH TRADITIONAL GLASSES  
ONLY MIDDLE RANGE

WITH TRADITIONAL GLASSES  
ONLY FAR RANGE

Dynamic Glasses technology keeps your sight relaxed while reading, watching TV, or performing high-precision tasks.

Easy to wear and to use.  
One single charge lasts for days.

## Technology & Key benefits

Inspired by space technology and developed by experts in the field of photonics, Dynamic Glasses rely on the patented technology behind Dynamic Optics' deformable lenses. These lenses deform their internal shape under the control of a special automatic algorithm that uses smart sensors embedded in the pair of glasses.
